

The Ultimate Fire-Training Experience On-The-Go

Our most feature rich portable simulator, Firebird measures at a stunning 80" x 50" (200cm x 125cm) training screen, while maintaining portable functionality and easy storage!

Real Fire Simulation

The power of the advanced graphic processors produces vibrant colour and dazzling clarity, immersing your students into the training environment.

The fire will ignite and create the emergency scene. The student will hear the rush of air as the flames appear. Just as in live fire training, the student will remove the ring pin and will need to firmly squeeze the nozzle valve, aiming ahead of the fire. As the student sweeps the nozzle back and forth, they will see and hear the agent discharging on the fire, which will reflash as a live fire would. If the discharge time is exceeded, the fire will roar back to life!

Video Studio

Firebird comes preloaded with four (4) fire scenes to fight.

Pyrosoft's Industrial line introduces the Video Studio, for creating your own fire scenes!

Simply upload your own photos into the custom fire scene creator and let your creativity heat up.

Certificate Keeper

The Print Manager provides automatic printing of Fire Safety Certificates. Student names can be entered before, during or after the training session.

Upgradeable

Your investment is never obsolete! As the software improves, so will your fire simulator.

Firefly becomes customizable by upgrading pieces from Pyrosoft's Industrial and Enterprise Fire Simulator Series lines.

Contents

Item	Quantity
Notebook Computer 14" - Windows 10 Operating System, Multicore, Integrated	1
Notebook Protective Sleeve	1
