

For those who need the ultimate training experience!

Get ready for the ultimate training experience with Pyrosoft! Our most feature-rich portable simulator delivers a stunning 110"x 80" (280cm x 203cm) training screen, while maintaining portable functionality and easy storage!

Roaring Graphics – Massive Screen

Fire safety doesn't have to be a hassle! Flamescape is the industry's leading fire safety solution that eliminates the need for costly fuel, extinguisher agents, or time between attempts. With our innovative live-action simulations, you can train your staff quickly and efficiently without ever having to leave the premises.

The best way to ensure that all employees are properly trained in a fire scenario is to require that all employees complete a fire safety training course. Depending on the size of the workplace and the need for costly fuels and agent, hands on training can be very expensive, resulting in only a small portion of employees actually being trained. Additionally, it is important to make sure that everyone knows what their role is in the event of a fire, and how to handle it safely.

Get your team up to speed with best-in-class fire safety training today with Flamescape!

Two Screen Options

Step into a world of flames with Flamescape, the ultimate fire training system. Our huge fire screens deliver a stunning visual experience with an amazing 4:3 or 16:10 aspect ratio.

Quad Nozzle Tracking

Create the perfect projection with Flamescape! Our precision nozzle tracking technology ensures accuracy and reliability for every firefighting attempt.

Upgradeable

Your investment is never obsolete! As the software improves, so will your fire simulator, with updates downloadable from the website.
