

Efficient, Economical, Ultra Portable

Flare is a compact, ultra portable fire simulator. The 53" x 30" (130cm x 80cm) training screen delivers good size fires great for smaller venues with minimal room space.

Budget Considerations? Venue Constraints? Flare is the answer!

Pyrosoft's Flare model is the complete training package for the trainer on the go. The widescreen portable notebook computer comes loaded with our classroom module where you can present the ready-made fire safety training presentation.

Flare comes with four (4) preloaded fire scenes to practice putting fires out on:

- Office garbage can
- Spill fire
- Electrical fire
- Gas mower

Additional fire scenes can be loaded upon request.

Fuel Record Keeping

The simulator keeps a record of daily and total amounts of fuel that would have been burned, and extinguishing agent that would have been discharged into the air if training had been done on a live fire.

Manage Difficulty Settings

You can set several different difficulty levels like flammability of the fuel, or reflash speed to keep your hands on training fun and challenging!

Upgradeable

Your investment is never obsolete! As the software improves, so will your fire simulator.

Flare becomes customizable by pulling bits and pieces from Pyrosoft's Industrial Fire Simulator Series.

Contents
