

## Enhancing Every Image, Sound and Dimension

Get ready for the ultimate training experience with Pyrosoft! Our most feature-rich portable simulator delivers a stunning 100" x 60" (254cm x 152cm) training screen, while maintaining portable functionality and easy storage!

## Roaring Graphics – Massive Screen

Flashpoint addresses a hot issue: Fire-safety training at most large facilities can be constrained due to factors like location, and the cost of fuel, extinguisher agent and time between attempts.

So frequently only selected staff members receive training. In a workplace of several thousand employees, there might be just a few hundred who know what to do in a fire scenario. Designed for companies that include fire-safety training on a scheduled basis, Flashpoint provides the tool you need on-site, to deliver valuable fire safety training to all employees. Flashpoint uses the Enterprise version of our Crossfire software to help fill that huge need in a big way!

### Two Screen Options

For Flashpoint screen size is everything. Pyrosoft offers two (2) screen options, aspect ratio 4:3 - 200cm x 150cm (80" x60") or aspect ratio 16:10 - 255cm x 150cm (100" x 60"). Both promise awe-inspiring fire scenes.

### Quad Nozzle Tracking

Precision nozzle tracking is accomplished by using a nozzle tracker behind the projection screen as a reference for increased nozzle positional sensitivity.

### Upgradeable

Your investment is never obsolete! As the software improves, so will your fire simulator.

Flashpoint becomes Flamescape, the ultimate in Pyrosoft's Enterprise series when you purchase the hardware upgrade.

## Contents

Item	Quantity
Notebook Computer 14" - Windows 10 Operating System, Multicore, Integrated	1
Notebook Protective Sleeve	1
Crossfire Software – Enterprise Version	1
Screen Option One: Rear Projection Screen & Frame 80"x 60" (200cm x 150cm)	1
Screen Option Two: Rear Projection Screen & Frame 100"x 60" (255cm x 150cm)	1
